PORTFOLIO PRESENTATION

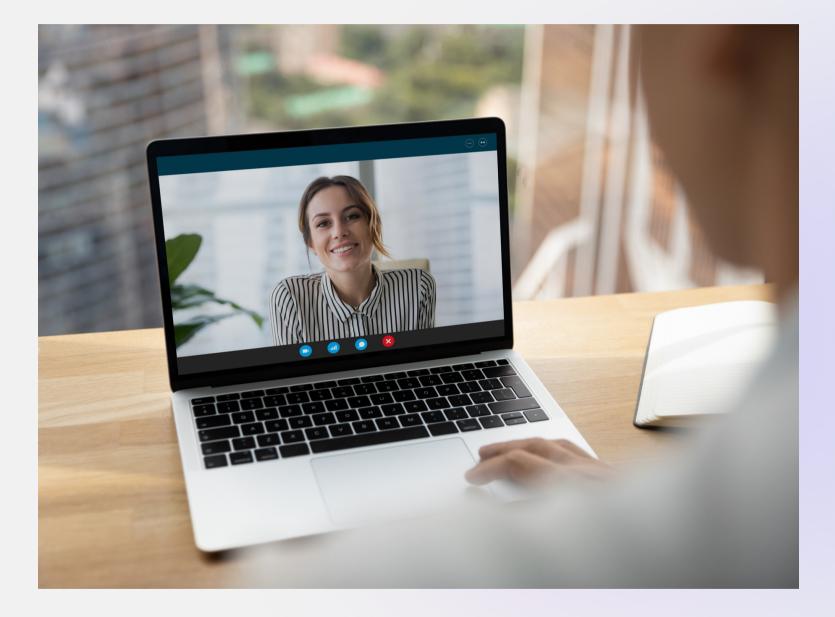

Content

Brief

The brief we were given for this project was to create an informative video for the website that showcases what the website is about, what they offer and how to get in touch.

Client Zoom

We had a zoom with the client where he said he wanted
the video to be cohesive with the branding. He was
unsure of the direction he wanted to go in with the video.
From this zoom we knew that the client wanted the video
to fit in with the theme of the website.

Video will begin with a logo animation that will finish with the logo front and centre.	The video will then transition into this part of the video which will be a welcome to screenplay which will tell the viewer a bit about the company.	This part of the video will look at the user/- client portal so that the viewer can under- stand how it will work and how they will be able to see how Their work is progressing.	This slide will also do similar to the one before, but will also talk about the packag- es that screenplay offer.	This slide will then be a client review which highlights the efficiency of screenplay.	This slide will include emails and contact details in the bottom left of the screen.

Production

To start of the video we used adobe after effects for the editing. We downloaded an intro from motion array that would have the logo imported into it. For this we needed to change the colours to match the brand guidelines. You can see how we changed the colours from the screenshots provided below.

Production

Moving on from the intro the first slide of the video would let the viewer instantly know what the business does. To create this slide we used a motion array template and again changed the colours but we also added in the text using the text tool and drawing out a text box where we wanted the text. We then implemented in a stock video into the template from pexels by dragging and dropping from files into the template.

In between the first slide and the second we added in a transition from motionbro again changing the colours to fit the branding. For the second slide was created from scratch. We implemented in the paper texture background from the website. We got the texture background from motion array and layered a blue gradient over the top. We added in the gradient by going into background, back colour, effect generate, gradient ramp. We added in text to the page and also imported a table graphic from the website. We did this as an image so that it would be easier to implement. We then animated each of these assets. We used scale animation and opacity animation. The table had a radial wipe animation and a gaussian blur that we also implemented.

Production

For the next slide we added in another motion array transition. We added in four videos masked in circles. We got the videos from pexels and created a clipping mask for the videos. The arrow was from motion array and we added in a scale animation and changed the colours then speed up the arrow animation. We then added in the text to this page.

Moving onto the next slide we used another morion array template again editing the colours, text and adding in stock footage over the top in a circular clipping mask as we did previously. We used a scale animation on this slide. For the final slide we repeated the same process as the previous slides and added in text animations, we used offset animation for this.

For the outro of the video we used a motion bro template. All we needed to change was the colours and add in the logo.

Feedback

Based on the clients feedback of the video we implemented in some changes. After we completed these changes that the client wanted we sent it back to the client and he was happy to sign off the video.

S Sammy 1mo 00:12 Should say Screenplay Report, not just Screenplay Reply 10 S Sammy 1mo 00:22 Let's change the titles to: **Brooklyn Nine-Nine** As Good As It Gets Mad Men Reply 10 Sammy 1mo 00:23 Instead of the User Portal title, can we use, My Slate Reply 1 Read by 1 person S Sammy 1mo 00:24 Change text to: "Once you've uploaded and paid for your first report, you'll be set up with a user dashboard we call My Slate. There you can keep tabs on all your scripts and get get real-time updates about the progress of any new reports you've requested. If you get an A, congrats! You're well on your way to the big time. If you get a C, don't worry about it. This is what reports are all about: finding out where you stand in order to move forward!"
